

The SLS course in Munich will be a custom, one-of-a-kind course built by CA Skateparks. All SLS courses are built in a way that facilitates different types of skateboarding by getting the SLS Pros out of their comfort zones. The goal with creating different courses for each stop of the Tour is to push the progression and innovation of skateboarding while the fans watch it go down live. Time and again these street courses have helped to create the buzz-beater moments so often seen on the SLS Nike SB World Tour where the win literally comes down to the last trick. We expect nothing different in Munich on July 2nd. Stay tuned for more details about the course being made for the SLS Nike Sb World Tour in Munich.
